SYMETRIX

ENTERPRISE IT IN MOTION

ENTERPRISE IT INFRASTRUCTURE
PARTNER

From end-user devices to core datacentre infrastructure, we advise, supply, and deliver across the full enterprise technology stack. We remove complexity from enterprise IT environments by combining strategic infrastructure guidance with disciplined procurement, responsive delivery, and commercial accountability.

As a brand-agnostic partner, we work alongside your team to simplify vendor engagement, coordinate procurement, and align technology delivery with your internal processes. Whether refreshing user devices, modernising datacentre infrastructure, or supporting long-term technology roadmaps, we help keep your enterprise IT environment moving without delay.

DATACENTRE INFRASTRUCTURE

WE KEEP ENTERPRISE IT MOVING

FROM INFRASTRUCTURE STRATEGY TO
PROCUREMENT AND DELIVERY.

Enterprise IT environments don't slow down because of strategy alone. They slow when infrastructure decisions, procurement, vendor coordination, internal approvals, and delivery become disconnected. What should be straightforward technology refreshes, datacentre modernisation projects, and infrastructure rollouts are often delayed by complexity, fragmented supplier engagement, and competing priorities.

Symetrix exists to remove that friction.

We act as an extension of your internal IT team, providing the expertise, responsiveness, and accountability needed to turn technology roadmaps into operational outcomes. From end-user devices to core datacentre infrastructure, we help you plan, source, and deploy the right technology for your environment.

Our clients operate complex environments where downtime, delays, and budget overruns are not acceptable. They need a partner who understands their infrastructure, aligns with internal approval processes, and helps them make informed technology decisions. By combining trusted advisory with responsive procurement and delivery, we ensure infrastructure refreshes, modernisation projects, and technology investments happen with clarity, speed, and commercial discipline.

By simplifying vendor engagement, maintaining commercial control, and coordinating delivery across multiple technologies and partners, we remove operational friction and provide a single, accountable point of coordination across your technology environment. We don't just deliver what you ask for. We help you make the right decisions, execute them efficiently, and remain invested in your long-term success.

Because in enterprise IT, success isn't measured by what you buy. It's measured by what you build, how effectively it's delivered, and the outcomes it enables.

WHY?

TRUSTED ADVISORY BACKED BY DELIVERY

Technology decisions should start with understanding your environment. We align with your infrastructure roadmap, recommend the right technologies, and back every recommendation with the capability to deliver it successfully.

SPEED WITH CONTROL THROUGH RESPONSIVE PROCUREMENT & DELIVERY

Rapid turnaround times, proactive communication, and disciplined execution keep procurement, refresh cycles, and infrastructure projects moving from requirement to deployment without unnecessary delays.

SIMPLIFIED ENGAGEMENT WITH ONE ACCOUNTABLE PARTNER

We provide a single point of accountability across vendors, technologies, and procurement, simplifying communication and reducing operational complexity for your IT team.

COMMERCIAL DISCIPLINE THROUGH STRUCTURED IT PROCUREMENT

Every technology investment is aligned to your budget, approval processes, and deployment timelines, providing commercial control and long-term operational value.

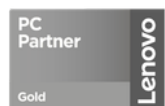

RELATIONSHIP-LED EXECUTION BUILT AROUND ACCOUNTABILITY

We build long-term partnerships by understanding your environment, taking ownership, and remaining accountable from planning through delivery and ongoing support.

POWERED BY THE AGERA ECOSYSTEM

As part of the Agera Group ecosystem, we extend our expertise through specialist businesses, giving clients broader technology capability, deeper technical knowledge, and long-term support.

ENTERPRISE IT BUILT AROUND YOUR ENVIRONMENT

From end-user devices to core datacentre infrastructure, we design, procure, and support the technology environments that keep business moving.

END USER COMPUTING

Reliable end-user technology that keeps your people productive, connected, and ready to perform.

- Enterprise laptops, desktops, workstations, and peripherals
- Structured device refresh programmes aligned to IT roadmaps

Key capabilities:

- End-user technology procurement through a single commercial interface
- Coordinated device rollouts across branches and departments
- Predictable delivery aligned to internal approval processes

ENTERPRISE NETWORKING

Network infrastructure that keeps your people, sites, and systems securely connected.

- Enterprise switching, wireless, and connectivity infrastructure
- Network expansion, refresh, and modernisation projects

Key capabilities:

- Enterprise networking solutions for distributed and multi-site environments
- Structured network upgrades aligned to operational requirements
- Scalable, resilient network infrastructure supporting business continuity

SOFTWARE & LICENSING

Software and licensing solutions that keep your organisation secure, compliant, and operating efficiently.

- Infrastructure, productivity, and security software
- Licensing strategy, renewals, and subscription management

Key capabilities:

- Software procurement aligned to budgets and approval processes
- Commercial licence optimisation and lifecycle management
- Scalable software platforms supporting enterprise operations

DATACENTRE INFRASTRUCTURE

Strategic infrastructure solutions that deliver performance, resilience, and scalability across your enterprise environment.

- Compute, storage, virtualisation, and cloud platforms
- Infrastructure migration, modernisation, and lifecycle support

Key capabilities:

- Infrastructure design aligned to business and technology roadmaps
- Datacentre modernisation, deployment, and optimisation
- Ongoing support for resilient, scalable infrastructure environments

LET'S KEEP YOUR ENTERPRISE IT MOVING!
